AR GLASSES

The Tentor M200 AR glasses enable companies to optimize their work processes, increase productivity and reduce the error rate. Workers can view digital instructions and information directly in their field of vision to minimize errors and increase efficiency. Doctors can access live AR-supported visualizations. In addition, AR glasses provide an effective training tool for employees by integrating interactive training content directly into the work environment.

Discover the possibilities of Augmented Reality with the M200!

We are happy to help you!

We will be happy to provide you with comprehensive technical advice. If you have any questions or require further information on our rugged devices, please do not hesitate to contact us. Our team looks forward to helping you select the optimal device for your requirements.
